The background is a complex, abstract composition. It features a grid of glowing, wavy lines in shades of red, orange, and yellow, creating a sense of movement and energy. Scattered throughout are various numbers (1, 2, 3, 4, 5, 6, 7, 8, 9, 0) and symbols (like the infinity symbol) in different colors and sizes, some appearing to float or glow. On the right side, there is a bright, starburst-like light source emitting numerous thin, colorful rays that fan out across the frame. The overall effect is one of magical, mathematical wonder.

Numbers Rule The Universe

In the world of Harry Potter, the solutions to life's most dire problems were locked behind numbers. The brave students of Hogwarts used arithmancy – a magical discipline that studied the magical properties of numbers – to predict the future. Arithmancy or numerology is a belief that everything in the world depends on numerical patterns, which come from the numbers' inherent vibrations

Not only in fictional best sellers, but also in the lives of people and businesses globally, numerology offers solutions and answers to innumerable problems and doubts in real time, only if you have the belief. A practice that dates back to the ancient civilizations of Atlantis, Babylon, Greece, China, and India, numerology has helped many unravel their lives' myriad mysteries and troubles – from financial issues to compatibility mismatches and emotional problems. While numerology may not directly contribute to broader global goals related to society, economy, politics, and environment, it surely serves as a tool for self-reflection, better understanding, and personal growth. By exploring the symbolic meanings of numbers and contemplating their significance in one's life, an individual may gain insights into one's own strengths, weaknesses, and potential paths for personal development. This self-awareness can lead to positive changes in attitudes, behaviors, and relationships,

which further can have a ripple effect on one's family and work.

HISTORY OF NUMEROLOGY

The fascination for numbers has been common to many polymaths. Ancient Greek philosopher and mathematician Pythagoras had said, "God built the universe on numbers" and "Number is the substance of all things." In an interview in the year 1931, the famous inventor, engineer, and futurist, Nikola Tesla said, "If you only knew the magnificence of 3, 6 and 9, then you would have the key to the universe."

Going back nearly 5,000 years, the science and art of numerology was followed in ancient Greek, Chaldean (ancient Mesopotamia), China and India. It has become especially popular in the last few decades, with people from all walks of lives now keen to decode the key numbers of their lives. An aspect of astrology, numerology deals with self-discovery and predictions. It helps one find the concealed meaning of the world. It can act as one's guide to life, probability of becoming bigger and better, and strengths and weaknesses.

STAY CALM AND FOLLOW THE NUMBERS

A belief in the divine or mystical relationship between numbers and coinciding events, feelings, and areas or themes of self-development, numerology is simple to understand and follow. For example, one needs the date of birth – to reach three important numbers of an individual, i.e., attitude number, life path number, and birth number – and letters of one's name – to reach the soul's urge number, power number and personality number. Each of these numbers has its own significant meaning and place in one's life and growth. There are particular energies and vibrations related to each number.

TAKE THE LEAD WITH THE RIGHT NUMBER

According to Dr JC Chaudhry – the first-ever Guinness World Record Holder in Numerology – numbers can lift an individual or a business from sadness, strife and struggles to peace, progress and prosperity. A success story himself, he credits numerology for his accomplishments at Aakash Institute, where he used the science all across – as a tool to save his time and appoint somebody and everything in between. He describes numerology to be a phenomenon that enlightens a colour-blind person to see the right signal while driving the car. The colour-blind driver cannot distinguish between red and green colours, so obviously he will meet with an accident.

Today, the famous numerologist plans to take the benefits of numerology to each and everyone, on matters as diverse as finding the right career to curing cancer.

How to ensure agile HR & Payroll operations, irrespective of the size of your business.

Business growth brings workforce expansion, and with it the challenges of managing their needs.

Leave, attendance, payroll, onboarding, exits, statutory compliances, letters, task management, salary disbursement, and a whole lot more.

Meet greytHR, a cloud-based, ISO 27001 certified HR platform. It effortlessly scales up to meet the rapidly changing HR requirements of growing organisations. Flexible enough to handle workforce sizes from a handful to several thousands, it's available in a pay-as-you-use monthly subscription model that ensures it's never burning a hole in your pocket.

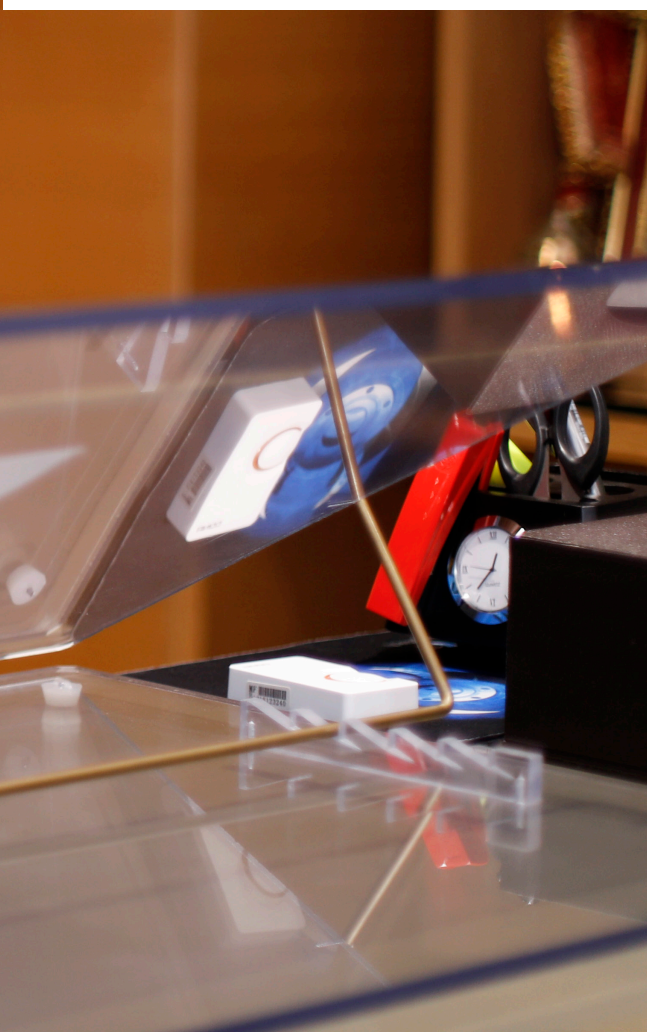

Visit greythr.com for more information. It's a simple step towards being prepared for business growth.

A Story of Determination and Self-Discovery

*FROM A DEDICATED TEACHER TO
A CELEBRATED ENTREPRENEUR
AND NOW AN ACCOMPLISHED
NUMEROLOGIST, DR JC CHAUDHRY'S
INSPIRATIONAL JOURNEY HAS
LESSONS FOR EVERYONE*

SONAM GULATI

If I ever wanted to be was a 'good teacher'. Everything else that happened was life's bonus."—Dr Jagdish Chand Chaudhry

Once Upon a teacher, always a teacher, stands true for Dr Jagdish Chand Chaudhry.

Born in Hathin, a tranquil village in Haryana, he spent over two decades teaching at several Delhi administration schools and colleges across Delhi and Haryana, before he took the plunge into entrepreneurship and started the iconic Aakash Educational Services Limited (AESL).

Dr Chaudhry always dreamt big. His humble beginnings only strengthened his desire to do something grand in life. He focused hard on his studies and completed his Master's degree

in Science (Botany) from the Birla Institute of Technology and Science (BITS), Pilani, Rajasthan in 1972.

He began his journey as a 22-year-old professor at a salary of Rs. 446 per month at Vaish College, Rohtak and he retired as a Principal of a Delhi administration school. In 1973, he went back to Delhi, the city of his dreams, and took up a teaching job at Hans Raj Model School, Punjabi Bagh. He then taught at Dayanand Anglo-Vedic (DAV) School for an year. His stint with government schools that lasted for 19 years was ridden with struggle, yet gratifying. During this period, he also added a bachelor's degree in Education (B.Ed.) to his qualifications.

For Dr Chaudhry, his students have been more than just a source of inspiration; they have provided him with a deep sense of belonging and purpose. Their enthusiasm, progress, and achievements have not only motivated him, but also instilled in him a profound sense of fulfillment and a shared sense

Did You Know?

— DR JC CHAUDHRY WAS DELIVERED AT A FLOUR MILL (CHAKKI) WHILE HIS MOTHER WAS AT WORK?!

— DR CHAUDHRY IS A SELF-CONFESSED MOVIE BUFF AND USED TO WATCH ALL MOVIES FIRST DAY, FIRST SHOW.

of purpose.

AN ENTREPRENEUR IS BORN

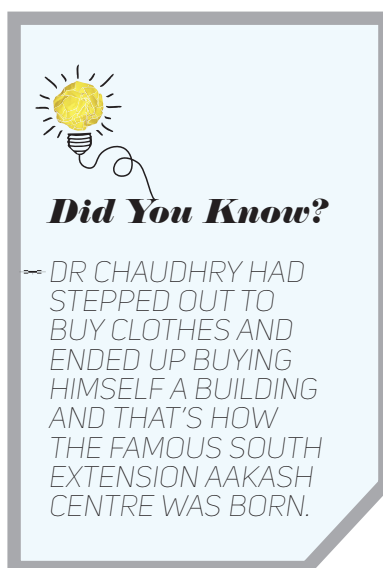

Before achieving success, every inventor experiences multiple failures along the way. One then explores various approaches until they stumble upon the right path. Pivoting is an essential aspect of entrepreneurship, and Dr Chaudhry's journey was no

exception. The creation of Aakash Institute was his “light bulb moment,” but it only emerged after numerous unsuccessful attempts, as is often the case with significant discoveries.

A teacher at heart, he also has the brain and brawn of an entrepreneur. He had the vision to monetise his teaching skills and turn his gift into a business

opportunity. Before he had the Eureka moment with Aakash Institute, he had made more than one attempt to set up various educational ventures. His first attempt was in 1977 and it was called N.C. Chaudhry Tutor Bureau. This outing as a first-time entrepreneur ended as quickly as it began. In 1982, he made another

attempt and founded Aashish College of Correspondence.

Based on a long-distance support model, the 'College' comprised a team of three teachers, including Dr Chaudhry. The team created sample test papers along with the answers for final-year students. The idea came up after all his classes at the school were packed. He decided to offer a correspondence course and prepare well-written notes for science students. The business may have had the potential to scale but at the time he did not have the resources to build the venture. He had to do everything himself and that left him with little to no time for anything else – not even food or sleep.

After months of toiling and working on barely 3-5 hours of sleep, Dr Chaudhry one day took a spur-of-the-moment decision after his friend brought him back to his senses. Like many of the earlier decisions, he took an intuitive, bold decision to stop this mindless drudgery. He went back to teaching full-time and decided to just focus on that even if that

means living on less money.

Dr Chaudhry's wife Kamla could see his talent as a coach and to encourage him, she founded Aakash Institute on 22 September 1988 at A-38, Ganesh Nagar, West Delhi. This was the first medical entrance coaching centre that they would ever begin which would eventually grow into the iconic Aakash.

At the start, the Institute chose to only coach students preparing for AIPMT (All India Pre-Medical Test), which was a conscious decision since Dr Chaudhry was a master of half the course for AIPMT. He ensured his students mastered the syllabus of Botany and Zoology, the two subjects that he taught. He was still employed as a school teacher when Kamla set up the Institute.

By 1990, the Aakash Institute began yielding remarkable outcomes. With students lining up to enrol in their classes, the demand grew so much that a second centre was opened. However, it was in 1993 that the Institute experienced a true turning point. A moment of "no looking back" arrived when an astounding 23 students from Aakash Institute were selected in Delhi PMT, setting a record as the highest count from a single coaching centre in Delhi. The following year, in 1994, a major milestone was achieved as Aakash Institute produced a top-ranking student in Delhi PMT, leaving everyone in awe and serving as one of the most significant highlights of their journey.

By 2000, Aakash Institute was a well-established brand in AIPMT testprep market, bagging the number one position in industry reviews and media surveys. The rest as they say is history.

Did You Know?

- AS A STUDENT, DR CHAUDHRY RAN AWAY FROM MATHEMATICS, YET, NUMBERS WENT ON TO BECOME HIS BEST FRIENDS.
- WHEN HIS FATHER REFUSED TO FUND HIS HIGHER EDUCATION, HE RAN AWAY FROM HIS HOME WITH JUST A FEW RUPEES IN HIS POCKET TO PURSUE HIS DREAMS.

IT'S ALL IN THE NUMBERS

It was in 1984 that Dr Chaudhry became fascinated with numbers. While on a leisure trip to visit his brother-in-law in Haridwar, he was casually introduced to the world of numerology. At the time, he was working as the Principal of the Model Co-Ed Senior Secondary School in Vikaspuri, New Delhi. His brother-in-law, Mr. Y.K. Gauba casually shared with him about a meeting with a renowned numerologist and how fascinated he was by the practice. The more he told Dr Chaudhry about numerology, the more intrigued he became with numbers. His logical mind was completely spellbound by the power of numbers. As the discussion stretched for hours, he felt extremely charged and excited to learn more about numerology. Later, he read every book he could find on the subject. He started reading numbers for everyone to test his knowledge. He soon

developed a certain knack for it and could tell everything about people's lives just by reading their numbers. Slowly but surely, his prowess with numbers became popular, bringing him a loyal following.

Looking back, the most significant instance after he learned about numerology was finding his actual birth date. He looked at his numbers and could tell something was not adding up. His birth date was not matching with the rest of the numbers and the course of his life or even his personality. When he got down to matching his temperament and his life's trajectory thus far to his date of birth he was convinced that this date was wrong. None of his characteristics matched the date of birth listed in his records which was August 1, 1949. He had to wade through a humongous pile of wrongly-filed records and many other hurdles to discover his actual birth date – November 18, 1950.

Dr Chaudhry went on to author two books on Numerology - *Advanced Numerology* and *Practical Numerology*. Today, he is hailed as a legend in numerology.

His YouTube channel, loaded with a series of informative videos, has a dedicated following of over 6,00,000 subscribers. Every video he posts elicits at least a million views. In his heart, he fostered a dream – of taking this science to the classroom level to give it the academic respect it deserves so that a class full of eager young minds could learn the science of Numerology and apply it to the realm of life. The educationist in him placed this ancient science of numbers on the same pedestal as Botany or Maths.

He envisioned an institute for numerology that would be akin to the stature of the IIMs – a gurukul for numerology that would have state-of-the-art facilities, ancient and spiritual in its academic offerings, with science at its heart. And much like his other grand dreams, he brought this idea to fruition as well.

On November 18, 2021, he established the International Numerology Day. On this day, he brought together seekers from over 10 countries and a grand forum for numerology – International Numerology Forum (INF) – was launched. It was

presided over by Rajendra Pratap Gupta, Chairman of the newly formed Internet Governance Forum of the United Nations. This was the first step towards starting a global-level institute for numerology.

Apart from educating people, the INF's agenda is to create a thriving platform where bright minds can discuss and explore this science.

A DEVOTED PHILANTHROPIST

Dr Chaudhry's unyielding faith in Maa Vaishno Devi has been the guiding force behind his remarkable success. To offer thanks for the endless blessings of the Goddess, he decided to build a shrine in her name at Vrindavan. Calling it a 'Dham,' he wanted it to be a shrine like no other where the Goddess would reside in all her glory. It was supposed to enable

Did You Know?

— THE MAGNIFICENT STATUE AT THE CHAAR DHAM EARNED DR JC CHAUDHRY A NAME IN THE LIMCA BOOK OF RECORDS.

those devotees who were unable to climb to the Bhavan in Katra to receive the Goddess' blessings right here in Vrindavan. The Dham was ready in 2010 and since then it has seen over 25 lakh devotees visiting each year.

The Dham, however, is by no means the only social contribution from Dr Chaudhry. He has an acute sense of social awareness and does not think twice before helping a cause. In his own words, "Money is simply a means to an end. How you use it is up to you."

There are many instances that can be cited to highlight his contribution to society at large. Once he instantly donated money to his village, Hathin, to build a crematorium when he saw the village elders being cremated in the open in the middle of a field. Another time he donated Rs. 10,00,000 to his fraternity of science teachers in Delhi to use for research and development. Sharing his wealth, knowledge, and expertise are his ways to contribute to the world and improve people's lives and help distressed and lost souls.

Chaudhry Nummero

AsiaOne Sustainability in Post- Covid Times Summit 2023

AsiaOne's summit on Sustainability in Post Covid Times – hosted at The Grand Hotel, Vasant Kunj, New Delhi – witnessed eminent politicians, diplomats and dignitaries talking about sustainability, solidarity, diversity and numerology

As India takes centre stage for global leadership on sustainability, the world is eyeing with awe and admiration India's presidency of the Group of 20 (G20). India's story of growth and resilience despite the COVID-19 pandemic has garnered applause from all quarters. Undoubtedly, India's Presidency of the G20 is set to bear fruits for the global economy, believe experts. India aims to take countries beyond the group members on its mission of 'global progress' with 'universal brotherhood.'

With the theme of 'One Earth, One Family, One Future,' the largest democracy and fastest-growing major economy in the world plans to share its success story of technology boosting financial inclusion and new idea of LiFE (Lifestyle for Environment) to G20 members, which together account for more than 85 percent of worldwide GDP, two-thirds of the world's population and 75 percent of global trade, and, making it a critical participant in assuring global economic growth and prosperity. India stands committed to the primary goal of the G20, to recognise the significance of collective action and global collaboration among major developed countries and emerging economies throughout the world.

In its mission to promote India's G20 goals through its various platforms and underline the positive change all the nations can bring in this world together, AsiaOne Magazine organised a summit on Sustainability in Post Covid Times at The Grand Vasant Kunj, New Delhi, India, on May 12, 2023. The summit also witnessed the Global Launch of Chaudhry Numero Private Limited (CNPL), an initiative of renowned Educationist, Entrepreneur and Numerologist Dr. JC Chaudhry. The focus of the summit was to discuss sustainability as one of the objectives of India's G20 drive this year, and promote the ancient science of numerology for global peace, progress and prosperity

H.E. Mr. Sinisa Pavic

Ambassador of Serbia to India

Today, we are talking about sustainability in Post Covid world. During the pandemic, in Serbia, we spoke about India's solidarity when it gave us COVID-19 vaccines. It was really important then. After some time, we had a wonderful situation where thousands of the Indian families – mostly friends and families of Indian students in some far countries – came to Belgrade to spend time before reaching their final destination. Even in the most difficult period, we had a positive result. This year, we are celebrating 75 years of diplomatic relations. During India's G20 presidency, which is based on 3D, i.e., Development, Diversity, and Democracy, we expect to talk about the importance of mutual understanding between our nations and with others. On numerology, I must share with you something famous Serbian scientist Nikola Tesla said, "If we could understand the mystery of numbers 3, 6, 9, we could understand all the magic of the universe." So, listening to the wonderful discussion on numerology today, I will return with a big challenge to think at least about these numbers.

H.E. Mr. Alejandro Simancas Marin

Ambassador of Cuba to India

would like to express my gratitude to the authorities of AsiaOne, and express my admiration for the work that Mr. JC Chaudhry is doing. It has been a nice and very important discovery for me today, all the work, all the legacy that he is, the work he is doing and the legacy he is living. It is also nice to be together with my dear friend Tara Gandhi and my colleagues from the diplomatic world. So, like my colleague from Serbia said, we must connect the idea of sustainability in the post-COVID times with the bilateral relationship between Cuba and India. We established our bilateral relationship on January 12, 1960. We always say that it has been 63 years of our friendship because it has been the reality, and the essence in our relationship from the very beginning. It has been based on friendship, cooperation, dialogue, and respect. This is important because Cuba and India have always been together in history and are together now in the present in defending the best values, the best causes of the world, defending the international law, the multilateralism, and the rights of people.

Smt. Tara Gandhi Bhattacharjee

Chairperson, National Gandhi Museum, New Delhi

I want to thank all of the esteemed guests and the organisers, and pay my homage to Number 9. This number has certainly brought me here because my birth number adds to nine. I was thinking how many questions I would ask my grandfather Mahatma Gandhi if I could go back in time. Maybe, I think, I would also ask him about his views on Number 9. The pandemic has taught us many lessons, that human beings are really not important unless they become positive, unless there is non-violence, unless they are brought together. When there was a pandemic, there were beautiful flowers, animals. Nature went well. So, if God has brought us on this planet, if Number 9 has brought us here, it is because we should be compassionate, loving, and responsible, as his Excellency, the Ambassador of Cuba, said. We should all be together for this and build a future.

Dr. Deepa Malik

President, Paralympic Committee of India

I represent a section of diversity. When I was, by destiny or by design, made to sit on the wheelchair for a lifetime in a body that is totally paralysed chest below, everybody felt sorry and sad for me. As time passed, I realised that I was the chosen one. I realised that there was so much more to be done and that purpose was way beyond me. This body has made me stand up for the rights of persons with disabilities. I have been able to contribute to the policies and the development of parasports in my country. Sports is yet again a platform which brings us together. I have friends across the globe, as I go there to compete, but we create friendships and empowerment through sports. I am doing my best to lead with examples. Whether in the fields of sustainability, diversity or bringing the world together with humility, I am doing my best. I thank you for this recognition. It has come as a very pleasant reminder that I have miles to go before I sleep.

Numerology, The Biggest Unifier

Peace, prosperity and progress, all begin with the letter P, which is the 16th alphabet, introducing the karmic #16/7, which stands for spiritual searching for truth, says Chris Styles, Founder, 365 Pin Code. A numerologist based in the United Kingdom,

Styles gives the example of COVID-19 pandemic to prove his point.

"If one actually looks at COVID-19 and the entire pandemic, it was a great reset massively in terms of absolutely everything pertaining to the world and how we think," he says. One of the things that he believes is incredibly important post COVID-19 is that people are in a state of searching, looking to connect and understand dots in a manner different to pre-COVID, and this, therefore, gives us numerologists like him an ideal platform and an ideal opportunity to introduce people to their authentic self through the magic of numbers.

Our outstanding group of international numerology experts that participated in the discussion on Sustainability in Post Covid Times underlined the importance of numerology in today's complex era. They also shared advice to help people resolve their personal issues and evolve to accomplish peace, prosperity and happiness for themselves and the world.

ANUJJ UBEROI

NUMEROLOGIST AND VAASTU
EXPERT, NUMBERS DOO
WONDERS

Numerology is the study of the relationship that numbers and letters have with our personality and life events. Famous mathematician Pythagoras is considered to be the Father of Modern Numerology. He was the first person to give a numerical value to each alphabet, like A is assigned the number 1, B is assigned 2, and so on.

The revolution in Name Numerology came around the early 1900s when an Irish named William John Warner travelled to India and studied this science in and around Maharashtra. He transformed the Pythagorean system to Chaldean system and said that each alphabet has a unique value based on the vibrations created. Warner later changed his name to Cheiro, and is considered to be the first person in the world to change his name numerologically. Chaldean Numerology is widely followed and gives far better and accurate results.

The alphabets in your name and their order of appearance also cause a huge effect. For example, multiple letters H in a name may cause some serious back pains, and a person with multiple Es may face some stomach-related problems. To conclude, your name is as powerful as your Date of Birth. Name Number plays a very important role in our lives. A good name number can be a game changer and vice versa.

ANKITA BATRA

NUMEROLOGIST,
THE BATRAA NUMEROLOGY

The Bhagavad Gita in Chapter 15, Verse 7, says, "The embodied souls in this material world are My eternal fragmental parts. But bound by material nature, they are struggling with the six senses, including the mind."

So, we are all the same at the level of consciousness; we are all Sachidanand (truth consciousness bliss). However, somewhere we all are differentiated by numbers. If you are 1, you are quite aggressive and a leader; number 2 is emotional, and so on. With numbers, we can identify different persons and deal with them accordingly. We can make a reputation with them in different ways. But yes, at the level of consciousness, we are all one. That's also the global message for our country: Vasudhaiva Kutumbakam. If we want to identify someone at the level of mind, we can use numbers. In terms of health, we analysed some alphabets, which when appearing in a name create many health issues. We have researched more than 10 alphabets and founded this as a case study. We are also studying Name Sounds and can tell how the next five years of a person will be health-wise, relationship-wise, career-wise, and money-wise, helping one shape one's life in a better way.

We need to contribute to numerology and see it as a purpose. The purpose is always to help the community worldwide.

DR ANURADHA RAI
CEO, SPIRITUAL LIFE COACH FZE,
DUBAI, UAE

From the very beginning of the universe, there emerged three major forces controlling the Universe, namely, Brahma, Vishnu and Mahesh. It is believed that numerology has its roots in these forces. From these base forces, the five elements of Space, Air, Fire, Water, and Earth came into existence. If we add up the whole of the universe, the total will come to number 9 which is considered as a freedom number and the basis that controls the universe, namely nine Devis, nine Ratnas, nine Nidhis, nine planets, 27 Nakshatras, 108 Charans, number of breath in 24 hours by a human (21,600), total nadis in human body (72,000); Sathya Yuga (17,28,000 years), Treta Yuga (12,66,000 years), Dwapar Yuga (8,64,000 years), and Kaliyug (4,32,000 years). From these statistics, the importance of number nine can be understood. With the help of these numbers, any matters related to anyone on a daily or yearly basis can be predicted. Chances of retrieving any missed items can also be predicted with these numbers. By merging numerology with astrology, we have achieved better and more accurate and precise predictions that have helped our clients. People and businesses have seen benefits throughout by following right numbers while choosing the names of companies, nature of work, right partners, and financial progress.

DISHA SINGHAL
DIVINATION EXPERT AND HOLISTIC
HEALER, ASKDISHAA

Numerology – the ancient art of discerning and predicting life's events through the study of numbers – holds great significance in our lives. Fortunately, in today's era, this valuable knowledge is widely accessible, and numerous experts are readily available to provide deeper insights. By delving into the world of numbers, we gain a profound understanding of ourselves. Armed with this knowledge, we can discern the lessons we are meant to learn in this lifetime and effectively overcome the obstacles that come our way. Numbers possess a unique power to shape our lives. By consciously surrounding ourselves with the vibrations of favourable numbers, we can pave the way for a smoother journey towards achieving our dreams and goals. This holds true whether we seek to optimise our name, mobile number, house number, car number, or, perhaps most significantly, find a compatible life partner. Moreover, numbers can serve as guiding forces in determining opportune days and dates for different tasks, and enhance our chances of success. When we find ourselves in an environment that resonates with us, we flourish and experience personal growth. Numerology acts as a catalyst in helping us attain such an environment, ultimately leading us towards fulfillment and self-actualisation.

Numerology provides the foundation for Advancements in Human Futurology research.

Have you ever heard of the term "human futurology"? Created by Chris and Suzanne Styles, Human Futurology is the study of numbers, sequences and patterns that define each person's unique Intelligent Mathematical Blueprint (IMB). Core numerology principles help decipher this grand organised experiential lifepath design within all of us.

Our years of in-depth test-and-learn analytics have created a 22D data-matrix of numbers, sequences and codes, which reveal the architecture of your life, past, present, and future. The predictive accuracy of their data-matrix is so spot-on that it will revolutionise how you think about, and plan for, your future. It also opens an entirely new dimension for C-Suite executives and HR specialists wanting to improve their employee growth methodologies and personnel risk management strategies.

Our research has conclusively proven that through your unique codes, number sequences and patterns, it is possible to look into your future with real strategic intelligence. This is why our work is attracting the attention of pragmatic thought leaders seeking to improve how human potential is leveraged within the complex world of work.

CHRIS AND SUZANNE STYLES
FOUNDERS, 365 PIN CODE

If you look around, you would realise that the world is basically recognised with numbers. We are born on a particular date, which comprises digits. The place that we are born at has a longitude and latitude, which again are numbers. The time that we are born at, so on and so forth, all of these represent numbers that rule us. This makes this science important to each one of us.

To me, the best aspect of numerology is that it gives you two sides. You get to know about your personality and characteristics that help you analyse your strengths, weaknesses, life's path, everything! Once you are able to decode these, you are able to solve most of your problems. We often wonder why a problem happens to us or how we should react to a problem. If my number is 1, which is ruled by Sun, then I also know that this number has the power to talk, or probably the power to talk as a frontrunner. But if my Number 1 is afflicted, I may not have confidence in pursuing my goal. The best thing for me then would be to remind myself that I have to focus on whatever work I have in hand. I must focus on it. This approach helps us in solving day-to-day problems as well as accomplishing the goals that we have in the long run. It also helps us channel our energies towards the bigger purpose of life.

MANISHA KAUSHIK
ASTROLOGER AND
NUMEROLOGIST, PREM
ASTROLOGER

PARI SAGAR
NUMEROLOGIST AND INTUITIVE
READER, DUBAI, UAE

Like musical notes, numbers are the vibration in the universe and have their own tones and frequencies. Each number has a specific value that has a cosmic vibration. Thus, numerology can be used as a powerful tool to explore and discover your own potential and destiny, cultivate your strengths and overcome your weaknesses, and use it to live a more successful life.

Numerology helps you in self-discovery and personal growth. It can help people gain a deeper understanding of their personality, strengths, weaknesses, potential, and unique gifts and talents, and make better decisions.

Another benefit of numerology is to create a more fulfilling life. By aligning one's choices, careers, and relationships with one's numerological profile, people can lead a more fulfilling and purpose-driven life.

Numerology can help you understand the personalities of others. This can lead to improved communication and understanding in your relationships. It further leads to increased intuition. Numerology can make you more aware of the signs and messages from the universe. This, in turn, leads to greater self-confidence. If you are looking for a way to gain a deeper understanding of yourself and your life, numerology may be a helpful tool.

**GOVIND VEDAPRAKASH
SHANDILYA**
NUMEROLOGIST AND LIFE COACH

Let us understand numerology with Karmic Debt 16/7 and its adverse impacts in life.

For people who are focused on their own growth with a limited sphere of influence, the numbers 13/4, 14/5, 16/7, and 19/1 are four "testing" or "warning" numbers. These numbers are often called "Malefic or Karmic Debt" numbers, and each bears a message of Karma to be satisfied. Karmic Debt Number 16/7 is the most dreaded among the four. It depicts upheaval and unexpected, quick, and profound change brought on by chaos in your work, relationship, or other important aspects of life.

I have examples of two Indian politicians, who have 16/7 in their chart, yet they made their debt and lived the lives of the Kings because they committed to serving humanity right from their childhood. Muthuvel Karunanidhi and Narendra Damodardas Modi lived beyond their comfort zone and focused on social welfare through their beliefs and actions.

The conclusion, thus, is to not fear Karmic Debt numbers in your name and DOB numbers. Gratitude and faith in God's plan are the two sure-shot remedies for 16/7 Karmic debt. To reduce the adverse impact of these numbers, have a positive mindset and be willing to grow beyond your personal agenda.

Need a Numerology Advice, Log in to Chaudhry Nummero

On May 12, 2023, in a glittering ceremony at The Grand Hotel, Vasant Kunj, New Delhi, AsiaOne Magazine celebrated the global launch of Chaudhry Nummero Private Limited (CNPL), an enterprise that aims to promote the ancient science of numerology for global peace, progress and prosperity

A numerology auditing firm, CNPL provides businessmen and entrepreneurs with business numerology auditing services. Founded by eminent numerologist, Dr. JC Chaudhry on September 20, 2018, the organisation is aimed at bringing a positive change in one's life with numerology. It is led by the belief that there is a divine, mystical relationship between numbers and the projection of life and all life events. Everything in the universe has an energy and vibration - and numbers are no different. To Dr JC Chaudhry, in numerology, all number(s) and letter(s) have their own unique vibrations that influence our life stories. The famous teacher and entrepreneur also believes that the secrets of occult sciences, including numerology, have not been explored fully yet, and Chaudhry Nummero can fill this gap. Decoding numerology's ins and outs, CNPL helps individuals and corporations align their destiny, deeds and perfect timing, and increase the probability of their success.

DECODING NUMEROLOGY

It is believed that numerology bridges the gap between who you are now and who you have the potential to become. It is one of those ancient mystical studies that lead people towards self-discovery and reaching their highest potential. Following the same ideology, Chaudhry Nummero is making people's lives easier. The firm offers a wide range of consulting services, such as basic numerology, relationship numerology

and career numerology, to name a few. It even provides end-to-end solutions of Vastu at home and office.

With Chaudhry Nummero, Dr. JC Chaudhry hopes to eliminate misinformation and myths surrounding numerology, and bring forth a more empirical and 'experiential knowledge' validated by experience in the domain of numerology with the objective of solving people's problems. The visionary even plans to set up an institute that would integrate numerology with modern science. With these initiatives, he aims to bring a change in everyone's lives with the power of numbers. CNPL offers numerology solutions and services to people, including eminent personalities, in India and countries across the globe such as the UAE, Canada, Singapore, South Africa, Malaysia, the UK, and Netherlands. The services include business numerology, name correction, newborn numerology, and marriage numerology, etc.

Numerology is one of the predictive sciences that reveal the hidden correlation between the numbers and what is happening in one's life. This science is usually based on the relationship between different numbers like psychic/date number, life path/destiny number, name number, ruling number, etc. The major advantage of the knowledge of numerology is to save time and take safety measures when bad times are anticipated.

In the past four years, the company's clientele has increased exponentially. From employees to company heads, everyone seeks guidance from Chaudhry Nummero. People can

contact Chaudhry Nummero's consultants for personal guidance regarding children, love, relationship, career, and even health. As for corporate houses, Chaudhry Nummero conducts numerological audits and helps identify the best time for investment and suitable names for brands and companies, among others.

JC NUMMERO APP

CNPL has also launched its mobile application. JC Nummero App to serve its rising clientele. The app gives free numerology reports on various dimensions of life. One of India's most reliable numerology apps, it is available for free on both Google Play and the Apple Store.

An outcome of 38 years of experience of Dr. Chaudhry, the app is based on Chaldean Numerology system, followed by Indian Numerology. It is also an interesting way to know about oneself with Chinese numerology, i.e. Lo-Shu Grid. It helps people discover which numbers are missing and getting repeated in one's grid, and offers remedies

for their effects.

Users of JC Nummero App can not only book a personal consultation with Dr. JC Chaudhry, but also reserve business consultation for their companies' numerological audits, and find out the compatibility of a person with one's existing business partner or with a person one wants to make a business partner.

A SERVICE TO THE WORLD

Dr. Chaudhry plans to expand the CNPL's reach by opening offices abroad. The beginning of the company's global journey found its first milestone in Dubai in 2022. He has also launched the Indian Institute of Numerology and the International Numerology Forum to spread awareness about this science.

Another important vehicle has been his YouTube Live Sessions on Numerology. His Live session on 1 January 2022 received global recognition for recording maximum participants. The online event saw over 6,000 participants from the USA, UK, Middle East, and India.

Numbers Have Built Fortunes

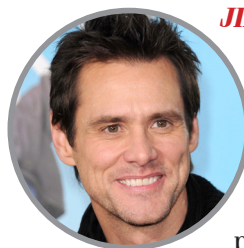

Don't believe us? Hear it from famous numerologist Dr JC Chaudhry, who credits numerology for him closing Aakash Educational's deal with Byju's. And, he is not the only human success story to have a fascination for numbers

In June 2023, Jacqueliene Fernandez added an extra 'e' to her name, following in the footsteps of her industry peers, Ajay Devgn, and Rajkummar Rao. The list of numerology-influenced names and messages is part of a trend that is global, with businesspersons, film stars and sports icons as followers. Here are a few celebrated believers of numerology.

MICHAEL JORDAN: The most outstanding National Basketball Association (NBA) player ever, Michael Jordan purposely used the energy of 23 to power his game. He won three championships in his number 23 jersey before retirement. He later made a comeback with number 45, but lost. It was enough for him to realise the mistake, and so made a re-return with his lucky number 23. Numerologists believe that the icon's Life Path 2 had empowered him to be a real team player on the court!

JIM CARREY: Another celebrity led by Number 23 is the famous *Mask* actor. It is believed that Carrey became obsessed with numerology while making the film, *The Number 23*. He changed the name of his production company to JC23, citing, among other reasons, the Earth's 23 degree tilt, the 23 seconds it takes for blood to circulate around the body, and the fact that he was born at 2.30 am. The 2007 thriller, *The Number 23*, is about a bland everyman who reads a pulpy detective novel, begins imagining himself and all the people in his life as characters in the book, and becomes obsessed with the numerology behind the eponymous digit.

BEYONCÉ: The accomplished American singer has a special connection with Number 4, and we are not only talking about her 2011 album, *4*. Her birthday is September 4 and her

husband's (Jay Z's) birthday is December 4; their anniversary is April 4; and their daughter, Blue Ivy was born on January 7, 2012, which according to numerology rules makes Blue's spirit number 4. "Many conspiracy theorists also speculate that "Ivy" represents the Roman numeral IV, otherwise known as 4. (It's okay to believe in numerology as long as Beyoncé does)," said *Cosmopolitan* in a feature in 2014.

PRINCE: The famous American singer, producer, musician, actor, androgynous icon, and a one-time Jehovah's Witness and committed student of the Bible, had a long-standing fixation with the number 3121. He repeatedly used the four digits, to name his album (*3121*), his website (www.3121.com), and his own fragrance, which he launched at his Purple Will Reign charity concert on 07.07.07. He even priced the tickets for his Earth Tour at the O2 Arena in London in 2007 at £31.21, say reports.

PARIS HILTON: The famous American media personality, businesswoman, socialite, model, actress, and singer often tweets when the clock strikes 11:11 and tells her followers to "make a wish." Angel number 1111 signifies new beginnings. Numerologists say that whenever you see it, see it as an indicator that you are on the right path. And, Hilton believes in the number completely. The heiress married on November 11 (the classic case of 1111) and has even founded a content production company called 11:11 Media!

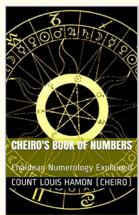

BOLLYWOOD: Not only films, but many celebrities in the Indian film industry also have fixed their names according to numerology. From Ajay Devgn (earlier Ajay Devgan) to Ayushmann Khurrana (do not miss the double n and r in the name), many have given their careers the much-needed fillip with right numbers, claim numerologists. The 'numerologic' extends to even films, their release dates and beyond, as many filmmakers choose auspicious numbers before launching their big-ticket projects. Films such as *Padmaavat*, *Shubh Mangal Saavdhan*, and *Judwaa 2* – with an extra 'a' – are only a few examples.

CHINA: Not just celebrities, numerology has also been important to countries. People in China traditionally attach meaning to numbers based on their pronunciation. Number 8 in Chinese is pronounced "baat" (sounding like "faat") which means "prosperity" or "wealth" and rhymes with the word for "fortune". On the other hand, Number 4 is considered to be unfortunate, as it sounds like "death". That's why, the telephone number 8888-8888 was sold for \$270,723 in Chengdu, China, and the 2008 Beijing Olympics opened on August 8 (08/08/08) at 8 pm.

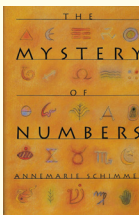

5 Numerology Bestsellers

Numerology has seen a glorious journey. For centuries, philosophers have researched on numbers and their connections to us, and documented their theories in books. Here are five bestsellers on the science from eminent Indian and international numerologists to get you started on the spiritual path laid by numbers

CHEIRO'S BOOK OF NUMBERS: One of the oldest books on numerology, this book is by Cheiro, the famous Astrologer and Palmist who also lectured on Chaldean Numerology, the ancient art of divination that dates back 5,000 years. The book offers advice that you can apply and use in your life and affairs. It also tells about the secret power numbers that can make you predict your own future accurately. You will soon realise that by adopting a minor change in your name, you can turn your bad luck into profitable gains.

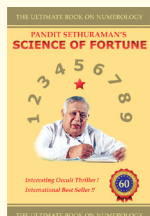

THE MYSTERY OF NUMBERS BY ANNEMARIE SCHIMMEL (FIRST PUBLISHED 1984):

Why is the number seven lucky—even holy—in almost every culture? Why do we speak of the four corners of the earth? Why do cats have nine lives (except in Iran, where they have seven)? From literature to folklore to private

superstitions, numbers play a conspicuous role in our daily lives. In this fascinating book, Schimmel shows that numbers have been filled with mystery and meaning since the earliest times, and across every society.

SCIENCE OF FORTUNE BY PANDIT SETHURAMAN:

Pandit Sethuraman was a famous numerologist born on May 31, 1925. In 1954, he published his all-time best seller, *Adhista Vinyanam* in Tamil. The book is based on the research done with Chaldean system of numbers. It was reprinted 26 times until 2013 without any publicity or promotion. It has been translated into English, *Science of Fortune*, by his son, VS Guruswamy, another famous numerologist. In a glowing tribute to the senior numerologist, on September 3, 1946, Divan of Mysore State and engineering genius, Sir M. Visvesvaraya said, "So far I was under the impression that Mathematics had only four facets, but this man –

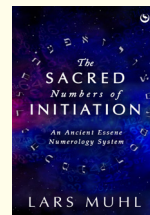

Pandit Sethuraman has revealed to me amazingly that it has a fifth facet too."

PROJECT 369: The Key to The Universe by David Kasneci: Project

369 facilitates the creation of miracles. In this book, people share about how they have manifested millions of dollars, dream businesses, new jobs, dream homes, soul mates, marriages, profound fulfillment, mystical experiences, divine purpose, Oneness, deep healing, recovery from lifetime afflictions like alcoholism, recovery from depression, ceasing negative self-talk, and much more. It contains the wisdom, science, and platform one requires to align their state of consciousness with their desires to successfully manifest them into reality.

THE SACRED NUMBERS OF INITIATION: An Ancient Essene Numerology System by Lars Muhl was launched on June 13, 2023.

The book by a bestselling spiritual author presents an effective system of numerology based both on secret teachings passed on in the remote Pyrenees and the author's extensive knowledge of the ancient Essenes. Its purpose is to inspire you and give you an idea of the spiritual qualities and potentials within you in this incarnation. When you are aware of them, you can evolve and manifest them. Simply put, the words attached to the numbers inspire you to "walk the talk."

No Longer Just A Number

An eternal science boosting health, happiness and prosperity of people world over, numerology has followers of every age – a good enough reason for it to trend on social media. Here are a few viral trends that refuse to die

LUCKY GIRL SYNDROME

One of the latest manifestation trends, Lucky Girl Syndrome has been running smoothly on TikTok. There are thousands of videos on the concept on the short-form video app. Lucky Girl Syndrome is the idea that you can attract things you want, from luck to money and love, by repeating mantras and truly believing things will work out for you. Women on the platform have claimed to have called in anything and everything. They insist that if you repeat positive affirmations and truly

believe in yourself, good things will come to you.

ANGEL NUMBERS

In numerology, angel numbers are a repetitive sequence of numbers, such as 1111. These numbers are shown to you to convey a divine message. After all, if you constantly see the same series of numbers – usually in a pattern of three – everywhere, it may be more than a coincidence. These numbers could show up on a car license plate, address, phone and bank account number, price and

time stamp, or wherever you could imagine. The #AngelNumbers hashtag on TikTok had more than 950 million views in August 2022. Another number, 1087 trended on TikTok in April 2023. The number 1087 means “I miss the old us,” and is included in videos where a person is recalling past relationships.

SPORTS NUMEROLOGY

Numerology can help you determine which opponent will win in a game by discovering each player's life path number. This ideology is called Sports Numerology. To experts, some numbers are even biased to be interested in certain sports. For example, Number 9 is usually interested in football, golf, hunting, karate, and football, while Number 2 is inclined towards archery, basketball, bowling, and fencing, among others. For players, numerology can be a way to find out the kind of challenges one is likely to face in the game, easing their anxiety.

369 MANIFESTATION METHOD

Number 3 is related to manifestations and the divine. According to Pythagoras, it is the “noblest of all digits.” Number 6 is related to harmony, a key element in manifestation, and 9 represents the completion of a cycle.

The 369 method says that the key to making your dreams a reality is ‘repetition, repetition, repetition’. Easy to follow, you simply have to pick an objective or concern in your life, write it down three times first thing in the morning, six times in the afternoon, and nine times at night before going to bed, daily. You also have to be patient.

Chaar Dham: A Spectacular Oasis of Spirituality and Serenity

Devotees visiting the famous Maa Vaishno Devi Dham in Vrindavan will soon have the unique experience of visiting 'Chaar Dham' at one place

MONALISA BISWAS

Nestled within the holy lands of Vrindavan, emerges the enchanting Maa Vaishno Devi Dham, a remarkable testament to spiritual reverence and architectural excellence. This extraordinary temple, spanning across an expansive 12 acres, has profoundly moved the hearts of devotees across India. Its inception took place in 2010 when famous teacher, entrepreneur and numerologist, Dr JC Chaudhry embarked on a noble mission. He aspired to facilitate a more accessible and intimate connection between devotees and the Goddess.

In years to follow, Dr. JC Chaudhry envisioned a holy sanctuary that would bring together the other cosmic forces, including Lord Shiva (Mahadev), Lord Krishna and Lord Shani to the sacred abode. The inauguration of Chaar Dham, comprising the Mahadev Dham, Radhe Krishan Dham, Shani Dham, and Maa Vaishno Devi Dham, took place

on August 23, 2021. These sacred sites, representing various aspects of Hindu religious beliefs, were formally made accessible to devotees, marking a significant milestone in religious pilgrimage tourism.

AN ARCHITECTURAL MARVEL

The intricate architectural planning of the spiritual destination and execution ensure that visitors can relive the Mata Vaishno Devi pilgrimage, complete with the sacred atmosphere and revered landmarks seen on the original path. The eye-catching interiors have been meticulously designed to evoke the emotions of devotion and spirituality among visitors.

The Chaar Dham also prioritises the comfort and well-being of its visitors, ensuring a serene and peaceful experience for all. Located within this sacred venue is a fully equipped guest house, which offers all amenities to cater to the needs of the pilgrims. Furthermore, a spacious prayer house has been

Did You Know?

OVER 30 LAKH DEVOTEES THROU THE MAA VAISHNO DEVI DHAM EVERY YEAR FROM ALL OVER INDIA FOR DARSHAN.

constructed for the devotees. It is capable of accommodating over 3,000 devotees at a time. This sacred space provides an ideal environment for prayer, reflection, and devotion. The Dham also has an organic farm that promotes sustainable and eco-friendly practices, serving as a source of pure and fresh ingredients. Moreover, a *gaushala*, or sacred cow shelter within the premises, exemplifies the Dham's reverence for animal welfare.

Dr JC Chaudhry's Jay Kay Trust has been recognised in the *Limca Book of Records* for the exceptional height of 141-feet Murti of Maa Vaishno Devi. The Trust's meticulous preservation of the pristine temple, lush gardens, and the awe-inspiring statue showcase its commitment to excellence, earning them this well-deserved accolade.

The construction of Chaar Dham in Vrindavan is progressing rapidly and is expected to be completed this year. Once accomplished, it will stand tall as a testament to the eternal pursuit of enlightenment, beckoning all souls to embark on a journey of soul transformation.
